Report 'No. 95-325

### DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1978

JULY 1 (legislative day, May 18), 1977.—Ordered to be primed

Mr. Stennis (for Mr. McClezilan), from the Committee on Appropriations, submitted the following

### REPORT

### [To accompany H.R. 7933]

95-604 O

### BASE OPERATING SUPPORT COSTS

As a result of the Committee's hearings in 1976, the Committee determined that a sizeable number of military bases had no mission other than to provide support to family housing or tenant units. Subsequently, the Committee requested the Department of Defense to provide base operating support (BOS) costs for all Department of Defense installations that had no military mission but existed primarily to provide support to tenant or family housing activities.

to provide support to tenant or family housing activities.

The department's response indicated that all installations exist, in essence, to provide support for tenant activities. However, there was a number of installations that clearly had little or no military mission. Data on these were provided in August 1976. The rationale used to select the installations generally involved selection of those with no substantial active force military strengths and/or combat type units or activities.

In November 1976, the Committee requested that a review be made of the same data previously provided for all similar military installations in the U.S. rather than just the select few that had been examined previously. The Committee requested the Department to dis-

play this data in meaningful form to include appropriate management indicators.

The Department recently responded to this request, and provided data for installations in the 50 States, using fiscal year 1975 as a baseline, but excluding certain logistics, research and development and other similar type facilities and installations that lack combat assigned missions or that are generally not capable of accepting such units.

The Committee received an analysis that for the first time displayed installations by mission categories, and included such data as total installation population, annual BOS costs for the installation, and certain school data. The data included such factors as the annual BOS cost per person, real property investment cost per person and other similar information. The report was prepared with the installations grouped using the installation Defense Planning and Programming category classification system developed for the Base structure annex required to be submitted to the Congress under the provisions of Section 302, Public Law 94–361, as part of the annual Defense Manpower Bequirements report.

The various factors provided gross indicators of resource utilization for real property investment, annual BOS cost per mission and total personnel, ratio of supported personnel to support personnel, and ratio

of BOS costs for each BOS personnel.

The Committee examined the data at various stages in the process. and questioned the military departments closely in the hearings on certain bases that appeared to be showing significant inefficiencies in their utilization of BOS resources. The Committee found a strong inelination for the military departments, in particular the Army, to fail to be responsive to questions about BOS costs and efficiencies. In the case of the Army, although the bases were clearly different, the responses to a Committee's questions tended to state repeatedly that all bases were funded in the "most austere" manner possible, that no base could be moved because it might damage recruiting potential. that any movement might degrade mission capability, that any additional travel might affect the zero energy growth program, and that base facilities were occupied at or near the 100-percent level. The Army responses further indicated that transfer of activities to other bases would be impractical because it would be too costly to duplicate technical equipment, that transfer to a nearby post would save little money, and relocation of a base would always require significant new construction.

In addition, the Army consistently maintained that unique services were being performed at almost every base and that this would preclude a move, and further that area support responsibilities were significant.

The general conclusion for almost every base hosting reserve components was that manning and costs were properly aligned with

the nature of reserve operations.

The Committee found that the factual data submitted by the Army and the other services placed the validity of the above answers in grave doubt. When similar bases in the same planning/mission categories were compared, very great disparities in BOS costs and management indicators were noted.

As a result of this, the Committee decided that where there were significant and unexplained discrepancies, adjustments would be made in the fiscal year 1978 BOS costs. The method used was as follows:

Determine median BOS costs per mission personnel for each

category of base.

Permit unexplained variances of up to 20 percent in excess of the median, but eliminate all unexplained variance in excess of 20 percent. This involved the reduction of both military and civilian personnel resulting from the calculated funding reductions. Although the data was from fiscal year 1975, the data was induced

by 20 percent to raise it to the fiscal year 1978 level.

The Committee has displayed below the results of this analysis. Although the funding reductions have been made to the various service budgets, the Committee wishes to emphasize that the military departments will be permitted to reallocate the reductions in a way that is different from that shown below. The Committee does not expect implementation of these reductions to result in any base closures, but rather in a more rational and reasonable allocation of base operating support costs at installations in the United States.

COMMITTEE RECOMMENDED ILLUSTRATIVE BASE OPERATING SUPPORT (BOS) ADJUSTMENTS

Because of the special nature of this base, his reduction was made by the Committee, Because of the special octivities of this base, only a portion of the reduction was made, as phown in the next 2 mile. Because of announcing (self-priment), no reduction was made by the Committee, or easy a portion of the indicate tion was made, as shown in the next 2 mile.

in: Detail may not add in totals have

The Committee is extremely pleased that it was able to review BOS costs systematically for the first time as a result of the submission of the detailed DOD data. Accordingly, the Committee directs that the

following actions be implemented.

- (1) DOD establish a uniform definition of BOS. This shall include but shall not be limited to: real property maintenance and operations. including installation engineering, installation transportation, installation supply operations (retail only), installation material maintenance, installation communications, administration (comptroller. command, procurement, personnel, training, et cetera) laundry, food mervice, community support (clubs, messes, libraries, morale, welfare, and recreational activities, etc.) medical and dental (except for area hospitals and dental clinics which should be considered separately) installation security, chaplain and any other activities at an installation which are required for direct support of the installation mission and tenants.
- (2) DOD define and provide uniform workload and performance measures that can serve as management indicators.
- (3) DOD provide uniform and realistic data reporting of such items as what population is, what staff and faculty is, what reserve load is, and what students loads are.
- (4) DOD establish realistic unit BOS costs (e.g. cost per battalion.
- cost per squadron) at bases where such units exist.

  (5) DOD provide military construction plans for each base along with the various data.
- (6) DOD provide the same data for 1968 as it provides for the current year, to the extent that the 1968 data are available.
- DOD should utilize the above direction to prepare and submit to the Committee a continuing report similar to the one provided to the committee this year, including all of the various management indica-

tors, averages, medians, et cetera, using standard definitions. The Committee directs that this report be submitted annually, coincident with the budget justifications, and include data for prior, current and budget years. The first submission is to be in January 1976.

## Explanation of Column Data

minor; RDT&E; Family Housing, Procurement, etc.) projects approved millions of dollars (\$ MIL). This entry consists of all MILCON Total military construction (MILCON) (defined as including all facility projects regardless of source or appropriation, i.e., and funded which have been started but not yet completed in from FY minus 2-years to the FY being reported.

- · For the FY 1976 DBFR, this MILCON would include:
- FY 1974
  - FY 1975
- FY 1976
- For the FY 1977 DBFR, this MILCON would include:
- FY 1975
  - FY 1976
    - FY 1977
- · For each subsequent annual DBFR, the data entry follows the above pattern.

Total Five Year Defense Plan (FYDP) MILCON including that authorized and funded but not yet started in millions of dollars (\$ MIL).

- · For the FY 1976 DBFR, this would include the cost of all projects in the FY 1977 Budget as approved by Congress.
- . For the FY 1977 DBFR, this would include the cost of all projects in the FY 1978 Budget as approved by Congress.
- . For each subsequent annual DBFR, the data entry follows the above pattern.

PLUS

4

## Explanation of Column Data

All MILCON included in the remaining four years of the FYDP related to the President's Budget of the then current FY (not DBFR reporting FY) in millions of dollars (\$ MIL).

- For the FY 1976 DBFR, this includes the projects contained for the first four Fiscal Years in the FYDP of FY 1978 to FY 1982.
- For the FY 1977 DBFR, this includes the projects contained for the first four Fiscal Years in the FYDP of FY 1979 to FY 1983 and may be estimated.
- · For each subsequent annual DBFR, the data entry follows the above pattern.

paved areas, etc.) remaining as a firm requirement of the installation's work plans prescribed by DoD Directive 4165.2 but which lack of facilities, etc.) as of the end of the RFY, in millions of dollars (\$ MIL). (The BMAR is the end of the fiscal year measurement of The total estimated value of the Backlog of Maintenance and Repair (BMAR) for all buildings regardless of source of funding or maintenance and repair work on all real property (i.e., buildings, categories of BMAR have been totalled for this entry - buildings, utilities plants and systems, and other facilities such as roads, resources prohibited accomplishment in that fiscal year.) Three appropriation (i.e., Family Housing, RDT&E facilities, medical utilities and all other BMAR.

millions of dollars (\$ MIL) based upon the uniform definition of Total annual Base Operating Support (BOS) costs for the RFY, in BOS contained in this document except MILCON for the reporting FY which is included separately as part of the data entry of
